Netsuite, Inc. Patent Portfolio Development and General Counseling

We represented NetSuite in developing its patent portfolio. This included serving as the exclusive virtual in-house patent counsel, identifying potential innovations, assessing the patentability of innovations and procuring patents for the company. In addition, we provided counselling in areas of risk assessment and pre-litigation planning in responding to contacts from non-practicing entities. As a result of our efforts, NetSuite has a valuable asset that may be used to obtain leverage in business negotiations.
